ELLEVATION

ELLEVATION PROPOSAL PREPARED FOR SAN LEANDRO UNIFIED
APRIL 15, 2015

Ellevation is a software company exclusively focused on English Language Learners (ELLs) and the educators that serve them. Today, Ellevation serves more than 335 public school districts across 31 states. The Company offers two integrated ELL-focused software products for use by school district educators:

- The **Ellevation Platform** puts all information and data about ELLs in one place, helping educators enhance instruction, save time, and improve collaboration.

- **Ellevation InClass** provides classroom educators with tools to identify their ELL students, learn about their language acquisition needs, and collaborate with all stakeholders to ensure instructional success. InClass works seamlessly with the Ellevation Platform to provide all educators with the data, insight and strategies they need.

Ellevation works closely with each of our district partners to understand needs, make adjustments to the product over time, and constantly improve the product based on feedback from the educators that are using Ellevation each day. The ability to move quickly, improve the product, and stay on top of policy and other changes helps make sure educators working with ELs have what they need to be successful.

Key Features

Inform Instruction & Support Collaboration

For quick analysis of data, and to support collaboration among all the educators working with ELs, educators can:

- Use the Ellevation Goal Center to set goals for students tied to CA's new ELD standards as well as Common Core State Standards (Ellevation has mapped the alignment between both sets of standards).
- Track goals and automatically generate reports to share with colleagues.
- View demographic, assessment, and other data in a dynamic graphical format on the Ellevation Data Dashboard.

Streamline Reclassification Process

With Ellevation, educators can:

- Easily view the ELLs that have met criteria for reclassification.
- Take action to exit students, begin the required Monitoring process, and generate required letters to families.

Effective Monitoring of Exited Students

With Ellevation, users can:

ELLEVATION

- Put in place a Monitoring process to enable the easy collection of feedback to review the progress of students.
- Flag students that may be struggling and help initiate additional attention and support.

Conduct Required Meetings and Take Action

With Ellevation, users can:

- Conduct LAT meetings, make and record important decisions, and easily look back at all meetings that have taken place.

ELL Data Collection, Management and Tracking, and Monitoring

With Ellevation, users can:

- Collect and organize a wide array of student data including ELD levels, services, monitoring history, duration as an EL, classroom modifications and more.
- Easily record and track testing accommodations.

Automatic Generation of Reports and Parent Letters

To save time, address compliance, and ensure educators have critical information for instruction, users can:

- Create individualized student plans aligned to CA's ELD standards.
- Run reports to show student performance and growth on ELP assessments.
- Generate Title III required letters to parents in 35 languages.

Ease of Implementation

The Ellevation training and implementation team includes data specialists and many former EL teachers and coordinators, who bring the unique perspective of having "walked in the shoes" of Ellevation users. These dedicated professionals will provide data integration support, in-person training, access to our help desk, multiple training webinars, and much more. Ellevation customers frequently cite the service team's responsiveness and knowledge of EL-related issues as a key reason for their high levels of satisfaction.

Technology

Ellevation is a web-based software platform that users can access from anywhere, at any time, with an internet enabled device (e.g., laptop, tablet, phone, etc). Ellevation supports all 4 major browsers (Safari, Internet Explorer, Firefox, and Chrome), and is compatible with district systems environments. All customer data and software code is hosted by a world-class managed hosting center, with redundant backup and disaster recovery procedures in place.

Contact

ELLEVATION
