Memorandum of Undersanding
Thinktomi, Inc.
AND
San Leandro Unified School District
For
Teacher Training on Thinktomi

June 18th, 19th, 2015

I. Purpose

This Memorandum of Understanding (MOU) is entered into by and between San Leandro Unified School District and Thinktomi, Inc. to provide teacher training on Thinktomi, Silicon Valley Education.

II. Background

Thinktomi offers programs for middle school and high school students to learn how to think like an entrepreneur and gain hands-on experience in launching a startup. Even if students don't choose this career path, the lessons will be invaluable.

In order to strike a balance between in-class learning and technology-aided distance education, Thinktomi has adopted a facilitated classroom approach. Facilitators engage students through exercises and classroom discussions. Technology can be used to ensure that the highest quality of thought leaders can share their knowledge with the class---whether in-person or virtually.

Our facilitation model allows us to deliver quality content directly from Silicon Valley. San Leandro Unified School District is offering enrichment summer school opportunities for middle school students. The Curriculum focuses on thinking like an entrepreneur and teamwork skills.

Ill. Statement of Work

Thinktomi, Inc. will provide two day teacher training to up to six teachers on June 18th and 19th from 8:00-3:00pm. Total cost $7,500.

Mike McLaughlin, Ed.D., Superintendent San Leandro Unified School District	Kari Edwards, Vice President Customer Relations, Thinktomi Inc.
