Re: Desktop Purchase

Background:

Microsoft will end all support for Windows 7 in January 2020. This includes phone support, updates, and security patches. San Leandro USD has legacy computers on the network running Windows 7. For security purposes, it's critical that we upgrade these machines to prevent any potential compromise of the San Leandro network. The purpose of this purchase is to maintain a positive security posture and services of the San Leandro network by purchasing 25 Dell desktops for computer upgrades across the District.

Description:

Obtain approval to spend $11,157.94 for 25 Dell desktops as a replacement for obsolete desktops throughout the District. The vendor will be STS, with funding coming from Measure J1 Bond Funds.
