Re: Staff laptop surplus and buyback

Background: Once the old teacher laptops are replaced the old machines will still have a bit of residual value left. IT has identified a surplusing company which will give us up to $210 for each machine as well as ensure no district data remains on the device. The technology department will also ensure these are cleared of sensitive information before sending them out. We estimate this amounts to roughly 500 units, a detailed list will be provided upon retrieval and inventory before they are sent out.

Staff are requesting approval to surplus the old Macbook Pro devices and resell them to SecondLifeMac.
