Re: Proposal for Heart Rate Monitors

Rationale:

Virtual learning has brought on new challenges for families and students especially in Physical Education. Heart Rate Monitors will provide an effective and efficient method of capturing individual student's physical activity while being monitored by their teachers. The Heart Rate Monitor is not only a student friendly tool, but also gives students awareness of physical well-being. Heart Rate Monitors support our JMMS school mission/vision, by empowering our students to take ownership of their physical and emotional well-being, through daily personalized, heart-centered learning and support. Additionally, this equipment broadens our ability to reach out and monitor the well-being of our most marginalized students.

Objective:

Our objective is to obtain three sets of Heart Rate Monitors. We have 5 physical education teachers at John Muir and in the future we hope to provide each teacher with a class set. Of the 250 Heart Rate Monitors needed to provide one class set of 45 Heart Monitors per teacher, the John Muir Physical Education department is requesting 90 heart rate monitors or two sets. We are asking the Educational Services to fund two of these sets, and John Muir will use site funds to purchase an additional set.

WHY Interactive Health Technology?

Providing students with Interactive Health Technology (IHT) aligns with our SLUSD Graduate Profile domain Healthy Mind and Body which states our students are confident in our intellectual, physical and emotional well-being and are able to make informed daily choices compatible with a healthy lifestyle. The Heart Rate Monitors will support daily physical well-being and will support
