RGM Kramer, Inc.
Attn: Devyani Agate
1145 Aladdin Avenue
San Leandro, CA 94579

SUBJECT: WSA 12938, SS21006; Relocate Existing 2-inch Water Service (Tap # M00052) to Accommodate Street Improvements at 951 Dowling Boulevard, San Leandro

Dear Devyani Agate:

Thank you for your application for the relocation of the existing 2-inch Water Service (Tap # M00052) at the subject premises.

The cost for this service is as follows:

Installation Charge	$14,611
Kill Fee (Tap # M00052)	2,293
Account Establishment Fee	60
Total	**$16,964**

Before work begins, EBMUD will obtain an encroachment permit from the City or County having jurisdiction in your area. If there is a paving moratorium on the section of roadway where your service will be installed, the encroachment permit condition will require that the existing pavement is restored and re-sealed to City/County moratorium paving standards, which could be a larger area than the standard trench. Please be advised that if moratorium paving restoration is necessary, the Applicant is responsible for making arrangements with a contractor to perform the moratorium paving restoration and for the additional costs associated with the restoration, as it is not covered under this estimate.

If you wish to proceed, please submit payment for the total above to my attention by mail at **375 11th Street, MS 104, Oakland, CA 94607.** One **Agreement for Water Services 2" and Larger** for the relocation of the 2-inch Water Service will be sent to you via DocuSign. Please have an authorized representative of San Leandro Unified School District electronically sign the agreement in the spaces provided. I will be notified automatically that the agreement has been signed. A fully executed copy of the agreement will be returned to you.

Once we receive your payment and signed agreement we will apply for an encroachment permit from the City of San Leandro. Upon receipt of an approved encroachment permit and

approval from our Backflow Prevention Unit, the work orders will be prepared and forwarded to our construction crews for scheduling.

It is the applicant's/owner's responsibility to mark the locations for the new service. The final location is subject to District approval. ***Meters will/must not be installed in current or future driveways, ramps, or any obstructed area.*** If a driveway or ramp is installed over the meter, the applicant/owner will be responsible for paying to have the service relocated out of the driveway, ramp, or otherwise obstructed area. Please paint a blue "W" on the sidewalk or place a stake marked "EBMUD" in your desired meter location.

An inspection is required to determine concurrence with EBMUD and State backflow prevention requirements. If your contractor has any questions regarding backflow, please contact our Backflow Prevention Unit at (510) 287-0874.

Billing for service charges begins when meters are installed. If water is not needed immediately after the meter is installed, it is the applicant's responsibility to contact Customer Services at (866) 403-2683 to close the account. Please be aware that the monthly Water Service Charge is based on the meter size. Reference "Schedule A - Rate Schedule for Water Service" in our Schedule of Rates and Charges.

The quote above is good for thirty (30) days from the date of this letter. Please contact me at (510) 287-1278 if you have any questions.

Sincerely,

Shawn Kunstal
